

Two engines. One growth machine.

**INTERNAL — TEAM
DISTRIBUTION**

SECTION 01

The two engines.

Everything in this system is one of two things. Engine One brings creators to the brand. Engine Two turns people into sellers. They feed each other — a creator who receives a box becomes an affiliate, and an affiliate who performs becomes a collaborator.

ENGINE ONE — CREATOR GROWTH COLLABORATIONS

We put the marketing budget into people instead of platform ad spend. Gift boxes, event collab packs, micro-influencer campaigns, docu-profiles — all of it converting money into product, relationships and film that keeps working after the spend stops.

- **The goal is people who make content.** Not a celebrity list. The people worth our time are the ones already producing — running events, filming, building an audience with their own hands.
- **Instruments:** the gift box (~\$40–55), the event collab pack (~\$200), production at \$12 a reel, and the targeted platform invite at zero cost.
- **Cadence:** 15–25 names a month, drafted by Amechi, approved by Keys before a note is written.
- **Owner:** Amechi, with Keys on the relationships he holds.

ENGINE TWO — THE AFFILIATE PROGRAM

Open to anyone. The job is not to recruit carefully — it is to **build a community of sellers, check in on them constantly, and hand them the tools to be good at it.** People do not fail here for lack of motivation; they fail because nobody told them what to post or answered their message.

- **It spans three selling platforms:** Shopify for the website and the customer relationship, TikTok Shop for in-app volume, WHOP for education, the leaderboard and campaigns.
- **The community lives in Zion** — hikes, events, and promotion of the events our own people are running.
- **The rhythm is the product:** a daily check so nobody waits, a Thursday call every week, a monthly challenge, and a tier that moves the moment someone earns it.
- **Owner:** Amechi, run day to day by Celina.

HOW WE MAKE DECISIONS

Borrow before inventing. The playbooks that work in this category are public — the category leader runs a wide affiliate base and graduates top performers into paid partnerships; the winning creator deals in 2026 are 6–12 month ambassadorships with a purpose component, not one-off posts. We copy what is proven and spend our originality on the brand, not the mechanics.

Decide from data. Every line of the budget has a number attached so that on the first of the month it can be judged rather than defended. A line that produced nothing does not repeat.

Go where the return is biggest. Website sessions went 428 last month against 166,000 Instagram views. That gap is worth more than any new idea in this document, which is why ManyChat goes in today.

EVERYONE READS ALL OF IT

Every tab on the internal site, and every document behind it. Read them properly — not skimmed — and download the PDFs for the parts that touch your role. **Then we meet, assign the to-dos, and start executing immediately.** The build list is eighty-two items long and most of it is unblocked today.

SECTION 02

Where we stand — August 2026 actuals.

METRIC

AUGUST 2026

WHY THERE ARE ONLY 23 AFFILIATES

Because there has never been a way to sign up.

Total sales (Shopify \$8,899 + Invest Fest net \$12,825)	\$21,513 — goal hit
Last week of August	\$2,000 gross · 45 orders · 6 new subscribers
Active subscribers	163 (near-term goal 500 · north star 1,000)
Top-selling product	8 oz coffee
Affiliate program	23 active · \$1,748 attributed since Aug 1
Top affiliate — Ruben Torres	~17 orders · \$736 (42% of affiliate revenue)
Website	428 sessions · 18.45% conversion
Instagram	166,000 views · 592 new followers · 615 profile taps
Instagram audience split	60% men / 40% women

SECTION 03

Who we are talking to.

The audience skews to **Black women, roughly 25–40, who are building something** — she works, creates, runs something or is about to, takes her mornings seriously, and is tired of wellness that talks down to her.

That is the default reader for the newsletter, the default casting for photography, and the weighting on the creator list — aim for roughly two-thirds women in each tranche and invite batch. Keys' own audience and the workout collaborations he brings cover the other side, through his brand rather than through this program.

It is an audience decision, not a restriction. The affiliate program is open to anyone, most of our current sellers are men, and nobody gets turned away. It simply tells us who to prioritise when there is a choice to make.

Every one of the 23 came through a personal conversation.

There is no public application page, no funnel, no automated welcome, no onboarding. The program has been a series of favours, not a system. That is the entire explanation, and it is fixable in a week.

THE FIX — OPEN ENROLLMENT

- **Anyone can join.** A public application form, an instant code, a welcome sequence. No gatekeeping on follower count.
- **The tiers sort it out.** Everyone starts at 10%. Performance moves people up. We find out who is good by letting them try, not by guessing in advance.
- **The SOPs do the teaching.** The Affiliate Handbook and the orientation course replace the personal conversation that does not scale.
- **Proven model:** the category leader runs a wide affiliate base and graduates top performers into paid partnerships. That ladder is what we are building.

THE OTHER THREE NUMBERS WORTH STARING AT

- **428 website sessions.** The smallest number on this page, against 166,000 Instagram views. The audience exists; the bridge does not. ManyChat is the fix and it goes in today.
- **42% from one affiliate,** who posts to Stories — content that expires in a day and reaches only existing followers. Moving him to feed and Reels is the cheapest upgrade available.
- **163 subscribers already pay us monthly.** They are the first affiliate recruits.

WHY THIS PARTICULAR AUDIENCE

- The Instagram audience is 60% men today, and Keys' read is that the brand takes off when it becomes a women's wellness brand with real depth.
- The collagen coffee — "Forever Young" — is the product this is built around, targeted before Black Friday.
- The adjacent supplement category proves the audience converts at scale: Olly signed Naomi Osaka, Thorne signed Misty Copeland, both May 2026.
- We could not verify a single 2026 functional-coffee partnership with a Black woman creator. The lane is unclaimed.

The tier ladder.

Three commission rates were confirmed live on the September 1 call. What did not exist was any rule for moving between them. It exists now, it runs on sales, and the windows are **30 days**.

T0 MEMBER

Anyone who signs up. 10% website, 15% TikTok Shop. Personal code, instantly. No approval queue.

T1 CREATOR

15% website, 20% TikTok. Product seeding each quarter, first access to drops, name on the leaderboard.

T2 PARTNER

20% website, 25% TikTok. **Membership card**, event collab pack, co-produced content, newsletter feature.

T3 FLAGSHIP

25–30% campaign windows. Docu-profile, event invites, golden tickets, 20 minutes with Keys.

TIER	WEBSITE	TIKTOK SHOP	WHAT UNLOCKS	PROMOTION TRIGGER
T0 Member	10%	15% open	Personal code and link, the Handbook, both communities	Automatic on signup
T1 Creator	15%	20% targeted	Quarterly product seeding, early access, leaderboard	\$400 in attributed sales within 30 days
T2 Partner	20%	25% targeted	Membership card , ~\$200 event collab pack, co-produced content, newsletter feature	\$1,000 in attributed sales within 30 days
T3 Flagship	20%	25–30% windows	Docu-profile, free event invites, golden tickets, 20 minutes with Keys	By invitation, Keys signs off

Reviewed the first Monday of every month, and the moment anyone crosses a threshold mid-month. Promotions are automatic when the number is hit — the rate changes the same day and the affiliate gets told. A rule nobody runs on a date is not a rule.

THE DOCTRINE THAT GOVERNS EVERY PAYMENT

Keys, September 1: "I want them to see the sale and then get a commission on the sale." No per-post fees, no retainers for content that does not convert. Cash goes to commissions and to production vendors. Creators get invested in with product, collab packs, membership cards, access and craft. Everything in this system obeys that.

The platforms — what each one is for.

PLATFORM	WHAT IT DOES FOR US	MONEY	STATUS
TikTok Shop	Native commerce — creators tag products and the sale closes inside the app. Our fastest route to traffic we do not currently have, and the Q4 engine.	Open collab 15% · targeted 20–25% · ~6% TikTok referral fee	Build now — live by Sept 15. Coffee, chocolate, creatine.

Shopify Collabs	The website rail: links, codes, automatic payouts, the application page. Owns the customer email and the subscription.	T0 10% / T1 15% / T2 20% first order	Confirm or set up this week. If Collabs is not installed, install it.
WHOP	Affiliate-specific. The orientation course, the leaderboard, campaign and challenge briefs, and where affiliate meetings are hosted. Free to run.	Free. Paid campaigns only after proof.	Create account, build hub. Everyone signs up.
Zion	Community-specific. Hikes, events, meetings, and promotion of events our people are running — including affiliates' own events. Antoine already runs it.	Existing	Set up the Supermind presence. Everyone signs up.
Instagram + ManyChat	The top of the funnel and the missing bridge. 166,000 views a month currently produce 428 sessions. DM automation closes that gap.	ManyChat subscription — reimbursable	Today. See Section 07.

Both WHOP and Zion, for everyone. They do different jobs and nobody has to choose. Full mechanics for all of it live in SM-AFF-04, the combined Affiliate Platform Playbook.

The funnel, end to end.

Nothing in this program works until someone can find it, join it, and be told what to do — without a phone call. This is the machine that replaces the phone call.

STAGE	WHAT HAPPENS	BUILT WITH
1 • Discover	They see an affiliate's post, a Keys post, a newsletter, or a gift box arrives. Instagram content carries no prices — the conversation moves to the DM.	Content + ManyChat keyword automation
2 • Apply	A branded application page: name, email, socials and follower counts, niche, why Supermind, where they will promote, shipping address.	Web form → Google Apps Script → Google Sheet the team can see
3 • Instant welcome	Automatic email within minutes: their code, their link, the Handbook, both community invites, the tier ladder, the first content prompt.	Email 1 of the funnel sequence
4 • Onboard	Days 2, 5, 10 and 21: how to post, what converts, the first-sale nudge, the tier reminder. Orientation course in WHOP.	Emails 2–5 + WHOP course
5 • Activate	First sale triggers a congratulations and a screenshot request. No sale by day 21 triggers a re-engagement.	Emails 6–7, triggered
6 • Promote	\$400 in 30 days moves them to T1 automatically. \$1,000 moves them to T2 with a membership card in the mail.	Monthly review + trigger emails 8–9
7 • Amplify	Their story goes in the newsletter. Their best content gets reposted, collab-posted, and boosted with permission.	Newsletter Network pillar + repost pipeline

Every email in this sequence is drafted as the Coordinator's first assignment — see SM-AFF-03. The form, the script and the sheet are built in week one — see SM-AFF-08.

What we are building — the asset list.

NEW THIS CYCLE

ASSET	PURPOSE	OWNER
Membership cards	Physical card for T2 partners and above. The club made tangible — the thing that makes a tier feel earned.	Amechi (design) · Mariah (print)
Gift box package design	A designed, repeatable box rather than assembled parts. Oxblood, gold, unboxing-ready.	Amechi (design) · Mariah (sourcing)
Affiliate application page	The front door. Form → sheet → automated email.	Amechi

MEMBERSHIP CARD — THE SPEC

- **Stock:** matte black or oxblood, 16–18pt, soft-touch laminate. Weight is the whole point — it should feel like a members' club card, not a loyalty punch card.
- **Front:** the SUPERMIND wordmark in Crown Gold foil, centered, on oxblood. Nothing else.
- **Back:** the member's name, their tier, the year they joined, their code, and one line of the World card language. Gold or ivory on oxblood.
- **Delivery:** mailed in a small rigid envelope with a handwritten line. Never bundled into a bigger shipment — it arrives on its own so it is an event.
- **Trigger:** automatic at T2. It is the physical proof that the ladder is real, and it is the single most photographed thing we will send.

Funnel email sequence	Nine emails, welcome through tier promotion.	Celina drafts, Amechi approves
AI UGC library	Reference content that shows creators what good looks like, produced by staff at near-zero cost.	Celina + Amechi · SM-AFF-07
Newsletter brand guide	Voice, pillars, templates, and the AI workflow that makes 3× a week achievable.	SM-AFF-06
Supermind calendar	One internal calendar: campaigns, holidays, events, product drops, brand dates.	SM-AFF-09
Product photography & video	Professional assets for TikTok Shop listings and everything downstream. Amechi leads this — not Steve.	Amechi

GIFT BOX — THE SPEC

- **Box:** rigid, magnetic-close, oxblood exterior with a blind-deboss wordmark. Ivory or black interior. No printed tape, no filler branding.
- **Insert:** die-cut tray so the products sit in place when the lid comes off — the first frame of the unboxing is the whole design brief.
- **Contents:** coffee, chocolate, a vessel, the World card, the affiliate code card, and Keys' handwritten note.
- **Landed target:** ~\$40–55 with the upgraded box. Sourcing is Mariah's; three quotes before committing.
- **Photograph the box itself** as a product — it becomes campaign content and the recruiting image for the creator program.

Today’s decisions and open flags.

#	ITEM	OWNER	BY
1	ManyChat goes live on the Supermind Instagram today. Amechi sets it up through his own account, which already runs the Keys and Supermind ManyChat. The subscription cost is reimbursed to Amechi — submit the receipt with the September expenses. Credentials go on the shared password list the same day. This is the single cheapest revenue fix available: 166,000 monthly views currently produce 428 website sessions.	Amechi → Mariah (reimburse)	Today
2	Gummies are out of the TikTok plan entirely. Not a debate to keep having — TikTok prohibits CBD, so gummies sell through Shopify, Instagram, email and affiliate codes, where they are permitted and the margin is better. Revisit the channel question later; it is not a September problem.	Settled	—
3	WHOP costs nothing until it earns something. Build the hub, host the meetings, run the course and the leaderboard — all free. Paid content-reward campaigns only after a capped test shows real numbers. Proposed test economics in SM-AFF-04.	Amechi	Oct pilot
4	Confirm Shopify Collabs is installed — and install it if not. No more assuming. Open the admin, look, screenshot, and if it is missing, set it up the same day.	Mariah + Celina	Sept 8
5	Product photography and video is Amechi's to lead. Professional stills and motion of every SKU, women-first casting, shot to the World Bible. Everything from TikTok listings to the newsletter depends on it.	Amechi	Sept 15
6	Keys × Amechi alignment remains the bottleneck. The media plan, the gift-box process, the target list and the AI-content sign-off all wait on it.	Keys + Amechi	ASAP
7	The \$2,500 media budget is use-or-lose by September 15.	Amechi	Sept 15
8	AI-generated people need Keys' sign-off before anything publishes. World Bible Edition 02 currently limits generated imagery to internal art direction. Two-track plan and the honest risk assessment in SM-AFF-07.	Amechi → Keys	Sept 15
9	Verify what the 18.45% website conversion figure measures. 428 × 18.45% implies 79 conversions against 45 reported orders.	Pam + Amechi	Sept 8
10	Goldwater is a side note, not part of this program. Keys' supplement catalog moving under Supermind Labs is a separate business track requiring Mariah to port formulas and re-create the line. Noted here only so nobody plans affiliate work around it.	Mariah + Keys	Separate

Discount codes appearing on coupon sites: mentioned in the Handbook as bad practice, not audited. If a code is producing sales it is producing sales.

Budget and scoreboard.

SEPTEMBER MEDIA PLAN — THE \$2,500

LINE	AMOUNT
Gift-box tranche 1 — 15 boxes, women-first	\$600

THE SCOREBOARD

METRIC	AUG	OCT 1	NOV 1	DEC 1
Affiliates enrolled	23	75	150	250

Kid Media micro-influencer campaign — 25 reels	\$300
Event collab packs × 3	\$600
TikTok Shop sample seeding — ~20 units	\$300
Subscriber seeding — top 10 longest-standing	\$200
Membership card + gift box design and first print run	\$250
ManyChat + tooling (reimbursed to Amechi)	\$100
Payout float + contingency	\$150
Total	\$2,500

Commissions are not a budget line — they are margin share on sales that already happened. Every line above has a number attached to it so that on October 1 this plan can be judged rather than defended.

Actively posting	~8	25	45	70
Affiliate revenue / mo	\$1,748	\$2,500	\$4,000	\$6,500
Subscribers	163	200	250	300
TikTok Shop GMV / mo	—	live	\$1,500	\$3,000
Website sessions / mo	428	1,500	3,000	5,000
Newsletters / week	0	3	3	3
Women share of IG audience	40%	45%	50%	55%
Boxes shipped / post rate	—	15 / 30%	35 / 30%	55 / 35%

Enrollment targets jump because the constraint was never demand — it was the absence of a signup path. Website sessions is still the number that matters most: everything in this program exists to move it.

Who does what, and the document system.

PERSON	ROLE IN THIS PROGRAM
B. Amechi	Owns the P&L. Strategy, the target list, the Keys relationship, top-tier outreach, the media plan, the application funnel, product photography and video, membership card and box design, docu-profiles.
Celina	Affiliate Coordinator — 8 hrs/week including a daily 10-minute check and the Thursday affiliate call. Applications, onboarding, tracking, payouts, fulfillment, follow-up. SOP: SM-AFF-03.
Keys	Founder voice. Newsletter topics and voice, monthly on-camera packing session, tranche approvals, T3 sign-off, the male lane and workout collaborations, home content set.
Mariah	Inventory, budget release and reimbursements, print sourcing, events, PR, the Goldwater track.
Pam	KPI deck, weekly reporting, newsletter build and scheduling, the subscriber email campaign.
Steve	Instagram content plan two weeks ahead, the Keys-led rotation, daily creator repost, ManyChat flows once live. Not product assets.
Antoine	Zion community — events in, notifications out, the Supermind presence.
Sakara	Board voice. PR push, budget discipline, metric challenge.

DOC	TITLE

GLOSSARY

- **TikTok Shop** — our storefront inside TikTok. Products listed, checkout in-app, orders in Seller Center. **TikTok Shop Affiliate Program** — the creator side of that same system, where creators tag our products for commission.
- **Open vs targeted collaboration** — open is one public rate anyone approved can take; targeted is a private invitation at a richer rate.
- **Collab pack** — ~\$200 of product and merch supporting a creator's own event, against filmed content and a tracked link.
- **Attribution** — which system gets credit for a sale. It never crosses platforms.
