

INTERNAL · PLATFORM BUILD

Whop Build.

How whop.com/supermind is put together, what lives in each tab, and how to change it without breaking the tier ladder.

PROGRAM

SUPERMIND TEAM

WHERE

PLATFORM · WHOP.COM/SUPERMIND

VERSION

V3.2 · SEPTEMBER 2026

STRUCTURE

Four products, one visible

PRODUCT	VISIBILITY	OPENS AT
Member	Public and free	Joining
Creator	Hidden	\$400 in sales in any 30 days
Partner	Hidden	\$1,000 in sales in any 30 days
Flagship	Hidden	By invitation

Only Member is joinable. The other three are granted.

TABS, IN THIS ORDER

Start Here · The Vault · Announcements · Help · Wins · Introductions · The Network · Zion

All eight appear on all four products, in that order.

START HERE

Eight modules, sixteen lessons

01 What Supermind is · 02 Your code and your link · 03 Your first post · 04 Disclosure · 05 What you can and cannot claim · 06 The format that converts · 07 The tier ladder · 08 Where to get help.

Two lessons per module. **Module 02 must contain the working code request. Module 05 is the claims module** and is reviewed by a person before any change goes live.

THE VAULT

Folders

Logos and wordmarks · Product photography · B-roll · Caption bank · Handbook and SOPs · Creator, locked · Partner, locked · Flagship, locked.

The three locked folders are visible to everyone and open by tier. Handbook and SOPs holds SM-CN-01, 02, 03, the Brand Kit and the World Bible, matching the public site.

ADMIN

Settings that matter

SETTING	WHERE	STATE
Welcome automation	Marketing · Support chats · user joined	Enabled, tested monthly
Announcements posting	Channel permissions	Admins only
Tracking links	Marketing · Tracking links	ig-bio, ig-manychat, tiktok-bio, newsletter, welcome-email, zion, outreach-dm. All to Store
Social links	Storefront settings	Instagram, TikTok, YouTube all to @supermindlab
Team seats	Add team	One seat per person. No shared logins

AFTER ANY CHANGE

Verify

Run SM-QA-01 with a test account. Specifically: the welcome fires, Start Here shows sixteen lessons, and a Member cannot open a locked folder.
